

TATTOO CONSENT FORM

1. ARTIST AND CLIENT DETAILS

Artist name: _____
Studio address: _____
Client name: _____ Address: _____
Telephone: _____ Date of birth: _____
Parent / guardian name: _____

2. CLIENT DECLARATION

I have considered the information in section 5. I have been informed of the possible risks and complications associated with tattooing and understand this information. I am not currently under the influence of alcohol, drugs or other substances that may affect my perception, free will or judgement.

The aftercare procedure has been clearly explained to me, and I understand the actions I must take and the precautions I must observe. I have received my own copy of the aftercare procedure.

I consent to the tattooing described in section 3 being carried out by the named tattoo artist. I confirm that the tattoo artist may retain this consent form on file. I am aware of and accept the risks and possible complications associated with being tattooed. I confirm that I have provided the above information and declarations truthfully and to the best of my knowledge, and that they are correct.

3. ARTIST DECLARATION

I confirm that tattooing will be carried out under hygienic conditions, using suitable sterile instruments and safe techniques, in accordance with NEN 17169, REACH and the corresponding national requirements. I confirm that the client has been offered a copy of this signed consent form and has been advised to retain the information.

4. SIGNATURES

Date: _____ Client signature: _____

Guardian signature: _____ Tattoo artist signature: _____

5. CLIENT INFORMATION ACCOMPANYING THE CONSENT FORM

Read the following information carefully and inform the tattoo artist if you have any doubts about your suitability for tattooing.

Tattooing and the healing process may involve risks and possible complications, as explained to you. You will receive aftercare instructions to help minimise the effects. Pain, redness and swelling are normal with tattooing. If these symptoms worsen during healing, this may indicate an infection and you should consult a doctor.

Some complications may be related to your health. For your safety, it is important to inform the tattoo artist of any such conditions. Additional precautions may be required. Tattoos are permanent and, depending on the ink used, may be difficult to remove. If in doubt, treatment should be postponed and medical advice sought.

Do not get a tattoo: if you are pregnant or breastfeeding; if you are under the influence of alcohol or drugs; or on a mole or a scar left after the removal of a melanoma.

The following circumstances or conditions may increase the risk of complications:

Skin

- Skin infection, regardless of its location or type.
- Allergies (state whether you have an allergy, for example to latex, metals or preservatives).
- Areas of skin that appear damaged or abnormal, including moles.
- Any active skin disease (for example eczema or psoriasis).
- Areas of skin that have undergone plastic surgery or radiotherapy, including recent scars and keloids (as indicated by medical advice).
- A previously tattooed area that has not fully healed.
- An area where a tattoo has recently been removed by laser or another method, if the wound has not yet healed.

General medical conditions

- Haemophilia or another blood-clotting disorder; epilepsy; cardiovascular disease; known allergies (for example latex allergy); diabetes; an autoimmune disease; immunosuppression and conditions involving a compromised immune system; sarcoidosis.

If any of the above circumstances or conditions apply to you and you still wish to have a tattoo, consult your doctor first and seek advice.

Additional information relating to COVID-19

I am aware of the enhanced measures in the tattoo studio and will follow these instructions. In the two weeks before being tattooed, I have not had symptoms such as a cough, fever or a runny nose; I have not been in contact with anyone who had these symptoms; and I have not travelled abroad.
